Boeing Helicopters was created as **Boeing Vertol** when the Vertol Aircraft Corporation company of Mortan, Pennsylvania was acquired by Boeing in 1960; the Vertol name was an abbreviation for Vertical Take off and Landing. Other names by which the division sometimes referred to itself in correspondence over the years were "Boeing Aircraft Company, Vertol Division" and "Boeing Philadelphia". The company was responsible for the design and production of the CH-46 Sea Knight and the CH-47 Chinook. The name became Boeing Helicopters in 1987, and the current name was adopted in 2002

Available in

- Corfu

Layout

Helicopter Feature

- Supports disaster relief operations and medical evacuation
- Maximum operating weight is of 23,000 lb
- Large cabin space

Special Features.

- 3% improved fuel consumption compared with C-1 model
- Reduced environmental impact through introduction of chrome-free primer and sealant
